

Location: Piraeus, Greece

Department: Software Engineering

Employment type: Permanent

We are looking for a Software Engineer to join us here at ICS SOLIX. Not just any Software Engineer though. Someone ambitious and genuine, who works best in the midst of a collaborative and forward-thinking team. This is a unique chance to get in on the ground floor of a rapidly-expanding company and be part of the architecture and development of some unique projects.

About us

ICS SOLIX Environmental Consultants is a Piraeus-based Consultancy company, oriented to Maritime and Industrial Engineering Consultancy. Our mission is to manage, via the development of innovative software solutions, the ever-increasing challenges of the maritime and industrial impact on the environment. To achieve that goal, we want to expand our Software Engineering team with people of high caliber.

About the job

At ICS SOLIX we understand that software engineering is a multidisciplinary field that requires a team effort. As such, our focus in building our teams is on finding passionate and hard-working individuals from different backgrounds and areas of expertise and bringing them together to work on a host of challenging and interesting problems. Our mission as a software engineering team in the company is to:

- Build new and exciting tools for our clients
- Improve our services through constant evolution and performance monitoring
- Liaise with Technical Dept., understand business needs and support our colleagues through useful internal tools
- Raise the standards of software development throughout the company

About you

First things first, we seek detail-oriented people with a strong commitment to accuracy and quality. If you are innately curious with a strong interest in self-development and growth, then you're already halfway there. Here's the rest of what we'd like you to bring to the table.

Requirements

- Experience with Computer Science fundamentals (data structures, algorithms, computational complexity)
- Software development skills using both object and functional-oriented design fundamentals
- Experience in building web applications
- Experience in at least one major backend language (like C#, C++, Java, etc.)
- Experience with relational databases and SQL
- Experience with JavaScript and/or CSS
- Fluency in spoken and written English

Ideal Candidate

- Bachelor's or Master's degree in Computer Science
- Experience as a software developer in developing applications using C#
- Experience developing mobile applications
- Familiarity with basic design concepts
- Knowledge of functional programming languages is considered a plus

What we offer

- A quite unique opportunity to join ICS SOLIX at the most exciting scale-up phase
- Competitive salary, in line with your skills and experience.
- Work from Anywhere (On-site, Hybrid, or Remote (Greece) - whatever fits your needs)
- Flexitime
- Work-life balance - we want you to win both at work and in life
- Free lunch (whenever in the office)

Diversity & Inclusion

ICS SOLIX is an equal opportunity employer; therefore, we do not select candidates based on sex or gender identity, mental disability or physical disability, religion, age, national origin or ethnicity, sexual orientation, marital status, veteran status, or parental status.

Whatever your path or background is, however you identify yourself, ICS SOLIX is a place to feel at home, express yourself freely and make your mark.
